Environmental Epidemiology
Division of Chronic Disease

SUBJECT: Request for Well Sampling

Per your telephone conversation with Mr. Garry Mills, Environmental Scientist of this Section, on August 13, 1990, submitted is a list of private residences whose wells we are requesting be sampled. The purpose of the sampling is to ascertain whether the potential for contamination exists from groundwater flow at American Chemical Services, Inc., or another source, the City of Griffith Airport.

The list of names was obtained from a meeting with groups of citizens who are concerned about potential health effects from contamination. The meeting was held on April 26, 1990, in a private residence with representatives from the Agency for Toxic Substances and Disease Registry and the Indiana State Board of Health in attendance.

If you need additional information or assistance, please feel free to call me at 633-8554 or Garry Mills at 633-8525. Please keep me abreast of the findings.
